Job Description: Intern- Research

Position Title: Intern - Research

Department: Research

Duration: As per organizational requirement

Role Purpose

The Research Intern will support the organization's research and knowledge-building initiatives by contributing to literature reviews, thematic research, and development of resource materials. The role is designed to provide hands-on exposure to development sector research, particularly in areas related to climate change, gender, and community participation.

Key Roles & Responsibilities

1. Working on a curated research repository – help identify and shortlist articles, policy briefs, case studies which may be of use for the chosen themes
2. Help develop research frameworks/resources to share –
 - Intersection of climate change x gender
 - Ownership of resources x community participation
3. Secondary Research for research studies:
 - Conduct reviews of literature
 - Assist in primary data-collection on field

Eligibility Criteria:

- Pursuing or recently completed graduation/post-graduation in: Social Sciences / Development Studies / Economics / Public Policy or related fields
- Familiarity with themes such as gender, climate change, or community development will be an added advantage
- Understanding of qualitative/quantitative research methods
- Proficiency in MS Word & PowerPoint and Canva
- Good written and verbal communication skills

Application Process:

Interested candidates can apply using [link](#) by 15th Oct.
